## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention I: Claims 1-72 are drawn to a method, corresponding system and storage medium for online settlement system for settling payment of a transaction online, classified in class 705, subclass 39.

Invention II: Claims 73-75 are drawn to a transaction management apparatus, classified in class 705, subclass 39.

2. The inventions I and II are distinct, each from the other because of the following reasons:

Inventions I and II are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I relates to a method and system for online settlement system for settling payment of a transaction online, whereas invention II relates to a transaction management apparatus. The method of invention I can be performed by a system configuration different from what is claimed in invention II. Hence invention I has a different utility and scope than invention II. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. A telephone call attempt was made on September 8, 2006, to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
